ISTE ASSIGNMENT Q1D WRITTEN

Q4d)

Paths

Relative path from assets/css/style.css to assets/media/logo.png:

../media/logo.png

Relative path from index.html to style.css:

assets/css/style.css

Absolute path of style.css on the RIT server:

/home/iff4185/public_html/team5_team5/assets/css/style.css |

Explanation of Permissions (755 and 644)

- **755 (rwxr-xr-x):** Used for directories.
Owner (7 = rwx): Read, write, and execute/navigate.
Group (5 = r-x): Read and execute/navigate.
Others (5 = r-x): Read and execute/navigate.
- **644 (rw-r--r--):** Used for standard files.
 - **Owner (6 = rw-):** Read and write.
 - **Group (4 = r--):** Read-only.
 - **Others (4 = r--):** Read-only.
- **Why HTML files should NOT be executable:**

HTML files are static markup files rendered by web browsers, not executable scripts or programs. Giving executable permissions to static files poses a security risk and is unnecessary for web serving.

3. Restricting quiz.html

shot
1.34 PM

assets/css/style.css

Absolute path of style.css on the RIT server:

```
/home/itf4185/public_html/team5_team5/assets/css/style.css
```

Explanation of Permissions (755 and 644)

- **755 (rwxr-xr-x)**: Used for directories.
Owner (7 = rwx): Read, write, and execute/navigate.
Group (5 = r-x): Read and execute/navigate.
Others (5 = r-x): Read and execute/navigate.

- **644 (rw-r--r--)**: Used for standard files.

•

- Owner (6 = rw-): Read and write.
Group (4 = r--): Read-only.
Others (4 = r--): Read-only.

- **Why HTML files should NOT be executable:**

HTML files are static markup files rendered by web browsers, not executable scripts or programs. Giving executable permissions to static files poses a security risk and is unnecessary for web serving.

3. Restricting quiz.html

```
chmod 640 quiz.html
```

```
chmod u=rw,g=r,o= quiz.html
```

- **What a visitor would see:**

A website visitor (who belongs to "others") would see a **403 Forbidden** error page.

- **Why:**

Setting permissions to 640 removes all read rights for "others" (o=---). The web server runs with "others" privileges for external visitors, so it will be blocked from reading and serving quiz.html.
