Relative path from assets/css/style.css to assets/media/logo.png: ../media/logo.png

Relative path from index.html to style.css: assets/css/style.css

Absolute path on the RIT server: /home/username/public_html/assets/css/style.css

755: Owner can read, write and execute. Group and others can read and execute

644: Owner can read and write. Group and others can only read
HTML files should not be executable because they are meant to be read and served by the web server, not run as programs

Command: chmod 640 quiz.html

This gives the owner read/write access, the group read-only access and others no access.

Website visitors may see **403 Forbidden** because the web server may not have permission to read quiz.html
